Project 2 Summary

Seyed Reza Mosavi

To solve the issue, I began by reading the "How to Contribute" guide for pytest and forking the repository. After reviewing the relevant code, I created a new branch to address the problem. I implemented the solution and added two tests to ensure proper coverage. Once the pull request was submitted, a project member reviewed it and provided suggestions, which I promptly addressed. After these changes were approved, the pull request was successfully merged, resolving the issue and closing it. issue
